Price: \$0.00

Ex Tax: \$0.00

Short Description

This vehicle is built in the new Speed Champions style and can comfortably fit four minifigs.

Description

I finally got the chance to go back and redesign my Volvo 740 MOC. I started with my original MOC as a base, but quickly changed pretty much the whole thing. The only things that really remained intact are the taillights and headlights. Everything else has been reworked to accomplish what I think is a much more accurate model. I had a lot of fun designing and build this model and I hope you do too!

This vehicle is built in the new Speed Champions style and can comfortably fit four minifigs.

I really enjoy posting these instructions and love seeing everyone's creativity. If you build one of my MOCs, please consider posting a picture of your version!

*Note: If you already purchased the instructions for the original MOC, please DM me and I will send you the updated plans.
